

## Recipe Assistant Chatbot

 egg and rice

 Based on your query "egg and rice", I think Recipe 2: **Easy Chicken Fried Rice** is a great match! This recipe combines cooked rice with chicken, carrots, soy sauce, and vegetable oil to create a simple and satisfying dish.

While there isn't an exact recipe that only uses eggs and rice, this recipe does incorporate rice as the main ingredient. You could easily modify it by adding scrambled eggs or using cooked egg as a protein source in place of the chicken. The soy sauce will also complement the flavors nicely!

Would you like me to suggest any modifications or variations to make this recipe more suitable for your taste?
